1.- Product and Company Identification

Product Name  
Fiber Glass, Polyester, Polyester/Fiber Glass. untreated narrow woven fabrics

Revision Date  
01/27/2012  
05/10/2009

Company Information  
Hesgon  
3330 East 14th Street  
Brownsville, Texas 78521

Telephone #  
1-956-542-5491

2.- Composition / Information on Ingredients

E-glass is composed principally of oxides of silicon, aluminum and calcium, fused in an amorphous vitreous state

3.- Hazards Identification

Emergency Overview

Polyester narrow woven fabrics made of polyester yarns

Low hazard exists for usual industrial or commercial handling
General hazard information
This yarn may have been produced using lubricants, additives. If this yarn contains any of these materials in an amount that may present a hazard in an amount that may present a hazard, or requires additional precautions during normal handling and use, additional information has been included in the appropriate section in this MSDS.

OSHA regulatory status
While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CR 1910.1200). this MSDS contains valuable information for the safe handling and proper use of the product.

Potential health effects

Eyes
Fiber particles and dusts may be mechanically irritating when in contact with eyes. Symptoms include itching, burning, redness, tearing.

Skin
Not expected to be a primary skin irritant. Fiber particles and dusts may be mechanically irritating to skin. While irritation is not expected under normal use, prolonged exposure and continuous rubbing of fiber particles on skin may produce skin irritation. Symptoms of mechanical irritation may include redness and/or itching.

Inhalation
Not a likely route of entry under normal use.

Ingestion
Not a likely route of entry under normal use. Ingestion of large amounts of fibers may cause gastrointestinal blockage which can cause stomach distress.

Fiber Glass narrow woven fabrics made of fiber glass yarns
Fiberglass may cause mechanical irritation to the skin, eye and upper respiratory tract.

Precautions
Avoid contact with eyes. Avoid contact with skin. Avoid breathing dust. Do not swallow. Do not eat, drink, smoke in work area.

Wash thoroughly after handling.

4. - First Aid Measures

Polyester narrow woven fabrics made of polyester yarns

Eye contact
Flush eyes with water as a precaution. If irritation persists get medical attention.

Skin contact
Product is not expected to be hazardous by skin contact. Should irritation occur, rinse with water.
Inhalation

No specific treatment is necessary since this material is not likely to be hazardous by inhalation. If exposed to excessive levels of dusts or fumes, remove to fresh air and get medical attention, if cough or other symptoms develop.

Ingestion

If swallowed do not induce vomiting. Never give anything by mouth to a victim who is unconscious or is having convulsions.

If vomiting occurs naturally, have victim lean forward to reduce risk of aspiration. Consult a physician if necessary.

Fiber Glass narrow woven fabrics made of fiber glass yarns

Inhalation

Remove from area to fresh air. If symptomatic, contact a poison control center, emergency room or physician for treatment information.

Eyes contact

Remove contact lens and pour a gentle stream of warm water through the affected eye for at least 15 minutes. If irritation persists contact a poison control center, emergency room, or physician as further treatment may be necessary.

Skin contact

Run a gentle stream of water over the affected area for 15 minutes. A mild soap may be used if available. If any symptoms persist, contact a poison control center, emergency room, or physician as further treatment may be necessary.

Ingestion

Gently wipe or rinse the inside of the mouth with water. Sips of water can be given.

Never give anything by mouth to an unconscious person. Contact a poison control center, emergency room, or physician for treatment information.

5.- Fire Fighting Measures

Polyester narrow woven fabrics made of polyester yarns

Flammable properties

May burn, but does not ignite readily.

Extinguishing media

Suitable extinguishing media

Use dry chemical, CO2, water spray or regular foam.

Unsuitable extinguishing media

Do not use solid water stream as it may scatter and spread fire.

Protection of firefighters

Firefighters should wear full protective clothing including self contained breathing apparatus.

Hazardous combustion products

Irritating and toxic gases or fumes may be released during a fire. Included are carbon monoxide, carbon dioxide, various
hydrocarbon fragments, as well as, thick smoke.

**Flammability**

Not determined

**Fiber Glass narrow woven fabrics made of fiber glass yarns**

**Flash point**

N/A

**Extinguishing media**

Use extinguishers appropriate for surrounding fire.

**Special firefighting procedures**

Fiber Glass itself will not support combustion, but in a sustained fire, proper protection against products of combustion from the fuel and sizing binder must be worn.

6. **Accidental Release Measures**

**Polyester narrow woven fabrics made of polyester yarns**

**Methods for cleaning up**

Sweep up or gather material and place in appropriate container

**Fiber Glass narrow woven fabrics made of fiber glass yarns**

**Action to be taken if material is released or spilled**

Sweep up or gather material and place in proper container for disposal or recovery. Use vacuuming or wet sweeping methods instead of dry sweeping.

7. **Handling and Storage**

**Polyester narrow woven fabrics made of polyester yarns**

**Handling**

Use care in handling/storage

**Storage**

Keep away from heat, sparks, and flame.

**Fiber Glass narrow woven fabrics made of fiber glass yarns**

**Precautions to be taken during handling and storage**

Store in dry area. Material is not an electrical conductor, and may accumulate static charge

8. **Exposure Controls/Personal Protection**

**Polyester narrow woven fabrics made of polyester yarns**

**Exposure guidelines**
Use local exhaust ventilation to keep formation of airborne dusts to a minimum when the fiber products are cut, chopped, or manipulated in other similar handling methods.

**Personal protective equipment**

**Eye/face protection**

When the fiber products are cut or manipulated in other similar handling methods, it may be necessary to wear safety glasses with side shields.

**Skin protection**

No special protective clothing is needed for normal use and handling. When material is heated, wear gloves to protect against thermal burns.

**Respiratory protection**

When dust or thermal processing fumes are generated and ventilation is not sufficient to effectively remove them, appropriate respiratory protection may be needed.

**General hygiene considerations**

Use good industrial hygiene practices in handling this material. Wash hands before breaks and at the end of workday.

**Fiber Glass narrow woven fabrics made of fiber glass yarns**

**Exposure limits**

8-hour Time Weighted Average (TWA); 15 minute Short-Term Exposure Limit (STEL)

**OSHA**

15 mg/m³ TWA (total dust)

5 mg/m³ (respirable fraction)

**ACGIH**

5 mg/m³ TWA (inhalable fraction)

1 fiber/cm³ TWA (respirable fraction)

**Respiratory protection**

If use or application of this product generates dust, use an appropriate NIOSH-approved particulate filter respirator.

**Ventilation**

Use local exhaustion or general room / dilution ventilation sufficient to maintain employee exposure below the permissible exposure limits.

**Eye/face protection**

Standard safety glasses with side shields.

**Protective gloves**

Use gloves to protect against physical irritation or injury if required by handling conditions.

**Other protective equipment**

Wear clean, body-covering clothing. Good personal hygiene and the use of barrier creams, caps, protective gloves, cotton
coveralls or long sleeved loose fitting clothing will maximize comfort. Vacuum equipment may be used to remove fibers from clothes. Work clothing should be laundered separately from other clothing before reuse.

9.- Physical & Chemical Properties

Polyester narrow woven fabrics made of polyester yarns

Form/Appearance Material is a filament yarn
Color White and/or color
Odor None
Flammability Not determined
Melting point 482-572°F (250-300°C)
Odor threshold Not determined
Solubility (H2O) Insoluble
VOC (Weight %) Not applicable

Fiber Glass narrow woven fabrics made of fiber glass yarns

Boiling point NA
Vapor Density (Air=1) Not applicable
Specific Gravity (Water=1) 2.6 – 2.7 (bare glass)
pH NA
Freezing/Melting Point >-1400°F (800°C)
Solubility (wt.% in water) insoluble
Bulk Density (kg/M3) NA
Volume % Volatile None
Vapor Pressure NA
Evaporation Rate NA
Heat of Solution NA
Physical State Solid
Odor Odorless
Color White

10.- Chemical Stability & Reactivity Information

Polyester narrow woven fabrics made of polyester yarns

Chemical Stability
Stable, however, may decompose if heated. Molten polymer or prolonged air drying of polymer at temperatures above 195°C will release small quantities of acetaldehyde (CAS# 75-07-0)

**NIOSH – Pocket Guide-IDLHS (Immediately Dangerous to Life or Health)**

| Acetaldehyde | 75-07-0 | 2000 ppm IDLH |

**U.S. – OSHA-Final PELs-Time Weighted Averages (TWAs)**

| Acetaldehyde | 75-07-0 | 200 ppm TWA; 360 mg/m³ TWA |

**U.S. – OSHA-Vacated PELs-TWAs**

| Acetaldehyde | 75-07-0 | 100 ppm TWA; 180 mg/m³ TWA |

**ACGIH-Treshold Limits Values – Current TLVs – Ceiling (TLV-C)**

| Acetaldehyde | 75-07-0 | 25 ppm ceiling |

**ACGIH-Treshold Limits Values – TLV Basis – Critical Effects**

| Acetaldehyde | 75-07-0 | eye and upper respiratory tract irritation. |

**Conditions to avoid**

Heat, flames and sparks

**Incompatible materials**

This product may react with strong oxidizing agents

**Fiber Glass narrow woven fabrics made of fiber glass yarns**

**Stability**

Stable

**Hazardous Polymerization**

Will not occur

**Incompatibility (Conditions/materials to avoid)**

None known

**Hazardous thermal decomposition/combustion products**

Fiber Glass will not burn, but smoking of the product may occur at approximately 400 – 500 °F (approximately 200 – 260 °C) due to decomposition of the surface binder. Surface binders may decompose in a fire situation and release carbon monoxide, carbon dioxide and water. Additionally, there are many chemicals that can evolve during any partial decomposition of chemical products. The amounts or identities cannot be predicted and can differ in each situation.

11. - **Toxicological Information**

**Polyester narrow woven fabrics made of polyester yarns**

Due to the high molecular weight, and results of toxicity studies of similar products, this material is to be of little to no toxicological concern.
Skin contact

Similar products produced no irritation or sensitization in skin tests on human subjects.

**Fiber Glass narrow woven fabrics made of fiber glass yarns**

**Carcinogenicity status**

This product is NOT listed as a carcinogen or suspected carcinogen by NTP, IARC, or OSHA

**Medical conditions aggravated**

None known

**Effects of overexposure**

**ACUTE**

Eye: Dusts from this product may cause temporary mechanical irritation to the eyes

Skin: Dusts from this product may cause temporary mechanical irritation to the skin

Inhalation: Dusts from this product may cause temporary mechanical irritation of the nose, throat and respiratory tract.

Ingestion: Although ingestion of this product is not likely to occur in industrial applications, accidental ingestion may cause irritation to the mouth and gastrointestinal tract.

**CHRONIC**

There are not known health effects from the long term use or contact with nonrespirable continuous filament fibers. Nonrespirable fibers cannot reach the deep lung because they have a diameter of greater than 3.5 micrometers.

Fibers of this diameter cannot penetrate the narrow, bending passages of human respiratory tract to reach the lower regions of the lung and thus, have no possibility of causing serious pulmonary damage. Instead, they deposit on the surfaces of the upper respiratory tract, nose, or pharynx. These fibers are then cleared through normal physiological mechanisms.

**12. Ecological Information**

**Polyester narrow woven fabrics made of polyester yarns**

**Ecotoxicity**

This product is not expected to produce significant ecotoxicity upon exposure to aquatic organisms and aquatic systems.

Based on similar substances, this material is expected to be essentially non-biodegradable.

**Environmental affects**

Based on the physical properties of this product, significant environmental persistence and bioaccumulation would not be expected.

**Fiber Glass narrow woven fabrics made of fiber glass yarns**

**Ecotoxicological information**

Fiber Glass is generally considered to be an inert solid waste. No special precautions are needed in case of a release or spill.

**Environmental fate**

No data at this time.
13.- **Disposal Considerations**

*Polyester narrow woven fabrics made of polyester yarns*

**Disposal instructions**

Any unused product, if discarded, is not considered a RCRA hazardous waste. Dispose as a nonhazardous waste in accordance to local, state and federal regulations.

*Fiber Glass narrow woven fabrics made of fiber glass yarns*

**Disposal instructions**

Waste material must be disposed of in accordance with federal, state, provincial and local environmental control regulations.

14.- **Transport Information**

*Polyester narrow woven fabrics made of polyester yarns*

**Department of Transportation (DOT) Requirements**

Not regulated

**General**

Not regulated as dangerous goods.

*Fiber Glass narrow woven fabrics made of fiber glass yarns*

**Proper Shipping Name**

Not regulated

15.- **Regulatory Information**

*Polyester narrow woven fabrics made of polyester yarns*

**United States Regulations**

**Federal Regulations**

Product as supplied, is an article under TSCA

**Superfund Amendments and Reauthorization Act of 1986 (SARA)**

**Hazard categories**

Immediate Hazard – No

Delayed Hazard – No

Fire Hazard – No

Pressure Hazard – No

Reactivity Hazard – No

**Section 302 extremely**

No

**Hazardous substance**

International Regulations
As an article the product does not need to be labeled in accordance with ES-directives or respective national laws.

Fiber Glass narrow woven fabrics made of fiber glass yarns

USA TSCA: This product is considered an article and is exempt from TSCA requirements
