**Regulatory Affairs Product Stewardship Information / Certification Data Sheet (RAPIDS)**

**Pro-fax 6323**

**Product Manufacturer**

This product is manufactured by Equistar Chemicals, LP.

**REACH (Regulation (EC) No. 1907/2006)**

Substances of Very High Concern (SVHC)

This product does not contain any of the Annex XIV candidate chemicals proposed to be Substances of Very High Concern (List as of December 15, 2010) above the 0.1% threshold as stated in REACH (Article 57, Regulation No. 1907/2006) determined either through (i) non-use of the substance, (ii) mass balance calculation, or (iii) specific testing.

The current list of all SVHCs can be found at the following link to the ECHA website:

**Chemical Inventories**

All ingredients in this product are in compliance with the following chemical inventories:

- United States: Toxics Substances Control Act Inventory (TSCA)
- Canada: Domestic Substances List (DSL)
- Europe: EINECS/ELINCS replaced by REACH
- Australia: Australian Inventory of Chemical Substances (AICS)
- Korea: Korean Existing Chemicals List (KECL)
- Japan: Japanese Inventory of Existing and New Chemical Substances (ENCS)
- The Philippines: Philippines Inventory of Chemicals and Chemical Substances (PICCS)
- China: Inventory of Existing Chemical Substances Manufactured or Imported in China (IECSC)
- New Zealand: New Zealand Inventory of Chemicals (NZIoC)

This product has no special requirements under US TSCA (e.g. consent orders, test rules, 12(b) requirements, etc.).

**Food Contact**

European Union (EU) Food Contact

The composition of this product complies with the following Legislations, Recommendations or...
Communications for the production of food packaging.

GERMANY: Bedarfsgegenstaendeverordnung- 30 November 2006 (BGBl I S.2730)

BFR is no longer applicable for this resin.

GREECE: AXE Decision n.458/2003 modified by Decision n. 454/2008

IRELAND: S.I. No. 587 of 2007, as amended by S.I. No.88 of 2009

NORWAY: "Kongelig resolusjon" of 11 March 1976 and updated 21/12/1993 N.1381 (Chapter II, Section 11)

PORTUGAL: Decreto-Lei n.º 197/2007 de 15 de Maio, amended by Decreto-Lei n.62/2008 de 31 de Março

SWITZERLAND: BGVO 817.023.21 of 23 November 2005, as amended.

CZECH REPUBLIC: Regulation of the Ministry of Health N.551/2006 modifying N.38/2001

Regulation 1935/2004/EC

This product complies with the applicable sections (Articles 1, 3, 5, 16 and 17) of 1935/2004/EC for resins in contact with food. This product is suitable for food contact as described below in our statements related to Directive 2002/72/EC and its amendments.

Regulation 2023/2006/EC

This product has been produced in accordance with GMP requirements as follows:
- Quality Assurance system in place
- Quality Control system in place
- ISO 9001 certified for Quality Management Systems
- ISO 14001 certified for Environmental Management Systems
- Awareness maintained at all levels
- Contamination prevention
- Effective Management of Change procedures
- Product manufactured to be suitable for the intended use

The base resin in this product meets the requirements in European Union Directive 2002/72/EC and amendments as the monomer(s) is(are) listed without any limitations. The additives are in compliance with 2002/72/EC and amendments; however, one additive has a specific migration limit (SML).

There is a process aid used in this product which has a SML.
DNBP (see phthalate section below for more information) is an impurity of a "technical support agent" used in this product. It has a SML (Specific Migration Limit) equal to 0.3 mg/kg (300 ppb) established in Directive 2007/19/EC (Substance PM/REF: 74880). The concentration of DNBP in this product is <0.05%.

To fully comply with food regulations in Europe, the overall migration as specified in 2002/72/EC and amendments from the final article to food can be no greater than 10 mg/dm2. The overall migration is determined using the procedures in Directives 97/48/EC (amending 82/711/EC) and 85/572/EC for the intended uses. In addition, the migration of the component(s) mentioned above must be checked to ensure compliance to the SML(s). This is the responsibility of the manufacturer of the final article. In order to obtain the identity of the component(s) with SML(s), a secrecy agreement will need to be established between LyondellBasell (or one of its companies) and the manufacturer of the final article. In addition, we remind you that the manufacturers of the final article must verify that the final article, manufactured according to good manufacturing practices, does not modify the organoleptic properties of the food.

US Food and Drug Administration (FDA)

The base resin in this product meets the FDA requirements contained in the Code of Federal Regulations in 21 CFR 177.1520(a)(1)(i) and (c)1.1a. According to our information, all other ingredients used in this product meet the requirements of their respective FDA regulations and 21 CFR 177.1520(b). This product meets the FDA criteria in 21 CFR 177.1520 for food contact applications, including cooking, listed under conditions of use A through H in 21 CFR 176.170(c), Table 2 and can be used in contact with all food types as listed in 21 CFR 176.170(c), Table 1.

Canada Health Protection and Food Branch (HPFB)

A letter of "no objection" for food contact use of this product has not been obtained from HPFB. If a "no objection" letter is needed, contact your company representative.

Tallow

Tallow derived additives may be used in the manufacture of this product.

**Bovine Spongiform Encephalopathy (BSE)/Transmissible Spongiform Encephalopathy (TSE)/"Mad Cow"**

One additive in this product is derived from animal sources. Our suppliers have stated that their additive is derived from bovine material. They have assured us that the animal material is sourced from the United States, Canada or Mexico. The bovine material can be any part of the animal. There were two sets of process conditions specified by our suppliers for processing the bovine material. These are: (1) Hydrogenation of tallow @200 deg. C, hydrolysis @260 deg. C, and 48 bar for 1.5-2 hours and vacuum distillation @232 deg. C; (2) Hydrolysis of tallow @260 deg. C and 700 psig for 3 hours, hydrogenation of stearic acid @232 deg. C and 300 psig for 2.5 hours, and distilled at 232 deg. C for 5 minutes.

Kosher

We do not certify our resins to be Kosher or in compliance with Kosher requirements.

**Food Allergens**

The following list of allergens are not used in the manufacture of or formulation of this product. The list includes:

- Peanuts, peanut oil, any peanut products;
- tree nuts (almonds, Brazil nuts, chestnuts, filberts, hazelnuts, hickory nuts, macadamia nuts, pecans, pine nuts, pistachios, and walnuts);
- refined or unrefined oils;
- Milk (casein) or milk products, dairy products, dairy derivatives, lactose with protein;
- Eggs or egg products;
- Soybeans, soy flour, any soy products;
- Fish (e.g. cod, salmon) or fish products;
- Shellfish, crustaceans (e.g. shrimp, crabs, lobsters, oysters, clams, scallops, crayfish);
- Molluscs (e.g. snails, clams, squid, octopi) or mollusc products;
- Sulfites;
- food colors;
- Celery or celery products;
- wheat (gluten) or wheat products;
- Seeds (e.g. cotton, poppy, sesame, sunflower, mustard) or seed products;
Aspartame;
Monosodium glutamate (MSG);
Caffeine;
Hydrogenated vegetable protein (HVP);
Grains (e.g. rye, barley, oats);
Lupine or lupine products.

**European Pharmacopeia (EP)**

This product cannot be certified for compliance to EP requirements.

This product has not been tested for E.P.

**Drug Master File (DMF)**

Information on this product is listed in DMF# 1698. Contact LyondellBasell for a DMF authorization letter to be sent to FDA.

**US Pharmacopeia (USP)**

This product has not been tested for USP Class VI.

**Latex**

"Natural rubber latex", "dry natural rubber", "synthetic latex" or "rubber that contains natural rubber" are not used in the manufacture of or the formulation of this product.

**Coalition of Northeastern Governors (CONEG)**

Cadmium, chromium (VI), lead and mercury are not used in the manufacture of or the formulation of this product. In addition, this product meets the CONEG requirements of less than 100 ppm for total incidental cadmium, chromium, lead and mercury.

Cadmium, chromium (VI), lead and mercury are not used in the manufacture of or the formulation of this product. This product meets the year 2001 requirements of less than 100 ppm for total incidental cadmium, chromium, lead and mercury. In addition, this product has the potential to be recycled according to these requirements.

**Heavy Metals testing results**

Testing of resins similar to this product has shown the following metals are not present at the sensitivities listed in parenthesis: antimony(3 ppm), arsenic(2 ppm), barium(2 ppm), cadmium(1 ppm), chromium(1 ppm), lead(2 ppm), mercury(0.01 ppm), selenium(3 ppm), silver(1 ppm).

**California's Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65)**

This product presents "no significant risk" for cancer (as the term is used in Proposition 65) to the people of California.

Reproductive toxicant, di-n-butyl phthalate (DnBP) or simply dibutyl phthalate (DBP) (CAS# 84-74-2), could be present in this product at levels below the detectable threshold (see, phthalate section of the RAPIDS). DBP is not intentionally added or used in the production of this product. However, there is potential for trace level DBP contamination, because DBP is a possible contaminant in diisobutyl phthalate (DIBP), which is a minor component of the catalyst system used to make the base resin in this product. Calculated estimates confirmed by testing of several resins indicate a potential total residual phthalate (all phthalates) content of less than 10-15 ppm (parts per billion) (0.02 parts per million or 0.02 mg/kg). A worst case estimate of the amount of DBP that could potentially migrate from the resin is calculated to be less than 10 ppb (parts per billion). Under Proposition 65, DBP has a no observable effect level of 8.7 micrograms per day. DBP has NOT been detected in our resins.

It is the responsibility of the California business owner to develop his or her own regulatory compliance plan.

**Butylated Hydroxytoluene (BHT) and Butylated Hydroxyanisole (BHA)**

BHT and BHA are not used in the manufacture of or formulation of this product. However, this product has not been tested for these chemical substances.
### Ozone Depleting Chemicals (ODCs)

Class I and Class II ODCs listed in the US Clean Air Act Amendments of 1990 are not used in the manufacture of or formulation of this product.

ODCs listed in the Montreal Protocol are not used in the manufacture of or formulation of this product.

### Phthalates

LyondellBasell is aware of the publicity about phthalate plasticizers. Phthalate plasticizers are in general used in specific non-olefinic resin systems to soften these resins and make them flexible. When phthalate plasticizers are added, they can constitute up to 50% of the resultant plastic material. LyondellBasell does not use any plasticizers in the resins it supplies. Polyolefins do not require the use of plasticizers to make them soft and flexible. Those phthalate plasticizers that have been associated with potential health issues, specifically di(2-ethylhexyl) phthalate (DEHP), di-iso-nonyl phthalate (DINP), di-iso-decyl phthalate (DIDP), di-n-butyl phthalate (DBP) and butyl benzyl phthalate (BBP), are not intentionally used by Basell in the manufacture of or formulation of its resins.

All LyondellBasell operations are guided by our commitment to be a responsible supplier, always respecting the health and safety of our employees, our contractors, our customers and the community, as well as the quality of the environment in which we live and operate. LyondellBasell is a firm supporter of the chemical industry's Responsible Care® program and the Product Stewardship code. LyondellBasell supplies polyolefin resins that are safe when used properly for their intended applications.

In keeping with the principles of Responsible Care®, LyondellBasell is supporting industry efforts to study chemicals for their potential to cause endocrine disruption.

As for this product, a phthalate compound, diisobutyl phthalate (DIBP), is a minor component of the catalyst system used to manufacture some of the base polyolefin resins. This is typical of polypropylene resins produced with high mileage catalysts. An impurity in the DIBP is di-n-butyl phthalate (DBP), sometimes referred to as dibutyl phthalate(DBP). During processing, DIBP reacts and converts to two related phthalate compounds diethyl phthalate (DEP) and ethyl isobutyl phthalate. The phthalates are "technical support agents" as defined by European Union Directive 2007/19/EC. None of the four phthalates has been determined to be human carcinogens or endocrine disruptors at the low levels as suggested by environmentalists. Testing of several resins has resulted in the identification of residual phthalates content no more than 10-15 parts per million. Further testing with food simulants, per general conditions of use as established in European Union Directives 2002/72/EC and 82/711/EEC and their amendments, has resulted in phthalate migration not detected at a sensitivity of 20 parts per billion (0,02 parts per million or 0,02 mg/kg).

A SML (Specific Migration Limit) equal to 0,3 mg/kg (300 ppb) has been established in Directive 2007/19/EC for DNBP.

To put these results in perspective, plastic materials that require phthalate plasticizers, referred to above, can have up to 500,000 parts per million (50%) of the phthalate plasticizer in them.

### Acrylamide

Acrylamide (CAS number 79-06-1) is not used in the manufacture of or the formulation of this product. However, we do not test this product for acrylamide.

### Aromatic Amines

Aromatic amines are not used in the manufacture of or formulation of this product. However, this product has not been tested for these chemical substances.

### Asbestos

Asbestos is not used in the manufacture of or formulation of this product. However, this product has not been tested for this chemical substance.

### Bisphenol A

Bisphenol A is not used in the manufacture of or the formulation of this product. However, this product has not been tested for this chemical substance.

### Dioxin

Dioxin is not used in the manufacture of or formulation of this product. Dioxin is not known to be formed during processing of this product.
**Epichlorohydrin**

Epichlorohydrin (CAS number 106-89-8) is not used in the manufacture of or the formulation of this product. However, we do not test this product for epichlorohydrin.

**Nonylphenol**

Nonylphenol and Nonylphenol ethoxylates are not used in the manufacture of or the formulation of this product. However, this product has not been tested for these chemical substances.

**Alkylphenol**

Alkylphenol ethoxylates are not used in the manufacture of or the formulation of this product. However, this product has not been tested for these chemical substances.

**Organo-tin Compounds**

Tributyl-tin (TBT), dibutyl-tin (DBT), monobutyl-tin (MBT) or any other organo-tin compounds are not used in the manufacture of or the formulation of this product. However, this product has not been tested for these chemical substances.

**Fluorocarbons**

Fluorotelemers, Zonyl fluoroadditives (DuPont trade name), perfluorooctane sulfonate (PFOS), perfluorooctanoic acid (PFOA), perfluorochemicals (PFC) or other fluorocarbon substances are not used in the manufacture of or formulation of this product. However, this product has not been tested for these substances.

The PFOA issue has definitely been a “hot” one. It is recommended that customers look at the following websites for information about the safety of PFOA and certain PFOA products. Information from these sources may help alleviate concerns about using PFOA products.

http://www.pfoa-facts.com/

**Polychlorinated Biphenyls (PCBs), Polychlorinated Terphenyls (PCTs), Polychlorinated Naphthalenes (PCNs), Polybrominated Biphenyls (PBBs), Polybrominated Diphenyl Ethers (PBDEs) and Polybrominated Terphenyls (PBTs)**

Polychlorinated biphenyls (PCBs), polychlorinated terphenyls (PCTs), polychlorinated naphthalenes (PCNs), polybrominated biphenyls (PBBs), polybrominated diphenyl ethers (PBDEs) and polybrominated terphenyls (PBTs) are not used in the manufacture of or formulation of this product. However, this product has not been tested for these chemical substances.

**Styrene and Polystyrene**

Styrene (chemical name: ethenylbenzene) (CAS number 100-42-5) and polystyrene resins are not used in the manufacture of or the formulation of this product. However, we do not test this product for these chemical substances.

**Vinyl Chloride and Polyvinyl Chloride (PVC)**

Vinyl chloride (CAS number 75-01-4) and PVC resins are not used in the manufacture of or the formulation of this product. However, we do not test this product for these chemical substances.

**Tris-Nonylphenol phosphite (TNPP) (CAS#: 26523-78-4)**

TNPP is not used in the manufacture of or the formulation of this product. However, this product has not been tested for this chemical substance.

**Chlorinated Paraffins**

Chlorinated paraffins, including short-chain chlorinated paraffins, are not used in the manufacture of or the formulation of this product. However, this product has not been tested for these chemical substances.

**Benzotriazole and 2-Mercaptobenzothiazole (MBT)**

2-((2H-1, 2, 3-Benzotriazol-2-yl)-4,6-di-tert-butylphenol [also called 2-(2'-Hydroxy-3',5'-di-t-tert-butylphenyl)benzotriazole] (CAS No. 3846-71-7) and 2-Mercaptobenzothiazole [also called 2(3H)-Benzothiolethione or Benzothiazole-2-thiol or MBT] (CAS No. 149-30-4) are not used in the
manufacture of or formulation of this product. However, this product is not tested for these substances.

**Azo Dyes and Pigments**

Azo dyes and pigments are not used in the manufacture of or the formulation of this product. However, this product has not been tested for these chemical substances.

**Regulation (EC) N.1895/2005**

BADGE, NOGE and BFDGE are not used in the manufacture of or the formulation of this product according to requirement of Regulation N.1895/2005.

**Polycyclic Aromatic Hydrocarbons (PAHs)**

We do not intentionally use the following polycyclic aromatic hydrocarbons (PAHs) in the manufacture of or formulation of this product:

- 1,2-dihydro-acenaphthene (CAS# 83-32-9)
- acenaphthylene (CAS# 208-96-8)
- 9H-fluorene (CAS# 86-73-7) anthracene (CAS# 120-12-7)
- benz(a)anthracene (CAS# 56-55-3)
- benzo(a)pyrene (CAS# 50-32-8)
- benzo(b)fluoranthene (CAS# 205-99-2)
- benzo(e)pyrene (CAS# 192-97-2)
- benzo(ghi)perylene (CAS# 191-24-2)
- benzo(j)fluoranthene (CAS# 205-82-3)
- benzo(k)fluoranthene (CAS# 207-08-9)
- chrysene (CAS# 218-01-9)
- dibenz(a,h)anthracene (CAS# 53-70-3)
- fluoranthene (CAS# 206-44-0)
- fluorene (CAS# 86-73-7)
- indeno(1,2,3-cd)pyrene (CAS# 193-39-5)
- naphthalene (CAS# 91-20-3)
- phenanthrene (CAS# 85-01-8)
- pyrene (CAS# 129-00-0)

However, we do not test our resins for these substances.

**Dimethyl Fumarate (DMF) - EU Commission Decision 2009/251/EC**

Dimethyl fumarate [2-butenedioic acid (2E)-, dimethyl ester] (DMF) (CAS#: 624-49-7) is not used in the manufacture of or formulation of this product. However, we do not test this product for DMF.

**Restriction of Hazardous Substances in Electric and Electronic Equipment (RoHS) - Directive 2002/95/EC, as amended.**

The information for RoHS can be found in the "Heavy Metals" (cadmium, chromium, lead, mercury) and the "Polychlorinated Biphenyls (PCBs), Polybrominated bipheyls (PBBs), etc." (PBBs, PBDEs) sections above.

**Composting - CEN Standard prEN 13432**

This product is not suitable for composting.

**Energy Recovery - CEN Standard prEN 13431**

The calorific gain from polypropylene in an energy recovery process is 24 MJ/kg.

**Ultimately customers must make their own determination that their use of our product is safe, lawful (except as provided in the above certifications) and technically suitable in their intended applications. Because of possible changes in the law and in regulations, LyondellBasell recommends that customers continuing to use our product verify status every year from the issue date of the RAPIDS.**
